

TIPS FOR ANDROID USERS:

PLEASE NOTE:

Do not use the car power adaptor included with NAVC-BHUDH156 to charge your smartphone, tablet, or other devices. The supplied car power adaptor outputs at 12-24V and is not designed to charge devices that require a lower voltage. Using the car power adaptor to charge these devices could damage them.

NEED TO KNOW:

- Android Auto  is integrated into phones with Android 10 and above. You do not need to download it from the Google Play Store.
- For Android 14 users: Ensure the Android Auto app is up to date before connecting with NAV-BHUDH156.

REQUIREMENTS:

FOR USB CONNECTION:

1. An Android phone with Android 8.0 (Oreo) or higher and an active data plan.
2. A high-quality USB cables. Not all USB cables will work with NAV-BHUDH156. For the best quality and reliability when you connect to Android Auto, try a high-quality USB cable.

FOR WIRELESS CONNECTION:

1. A compatible Android phone with an active data plan. Wireless projection is compatible with these Android versions (Please check the compatibility chart at the bottom)
